

Millwood Crafts

Welcome to the world of authentic and realistic looking farm buildings and accessories.

We believe simplicity is the key to stimulate a child's imagination and encourage them to think creatively having endless fun and playtime

Who are we?

Millwood Crafts is a family owned firm in which two brothers developed a niche market, hand crafting quality wooden farms within the Crafts industry. The firm was established in 2006 with its base on a small farm holding outside Benburb in Co. Tyrone. In 2005 one of our children requested a toy farm for Christmas. This wish proved difficult to fulfil, as we could not source a high quality durable product. Not to be beaten we decided to design and handcraft our own, modelled on the farm we grew up on. Unknown to us, the result was to be the beginning of Millwood Crafts.

Soon friends and family were requesting replica farms and the seed was planted. During this time the long-term sustainability of our small farm linked with an established agricultural maintenance business was in question.

Why our product?

Four simple words: **Quality. Unique. Personal. Passionate.** Over the past years we faced many hurdles which were overcome through passion, determination, guidance and the willingness to recognise our limitations and to build on them using strengths from ourselves and others.

Millwood Crafts produces a quality product which is unique in design with a truly personal touch and which is passionately handcrafted from one of our most natural sources.

Millwood Crafts is built around strong family values and we will continue to draw from these as we grow in the future.

Thank you for taking the time to look at our products. If you have any questions or comments please contact us. For your nearest stockist check our Website.

Many Thanks

(John Robinson)
